Anoka County Flood Vulnerability Report

Anoka County Vulnerability Report

Historical Flood Hazard Overview

Historical Flood Hazards have been identified from the following community Flood Insurance Study (FIS) reports.

- City of Coon Rapids, MN September 1976
- City of Columbia Heights, MN March 1978
- City of Circle Pines, MN March 1978
- City of Centerville, MN June 2, 1999
- City of Blaine, MN June 17, 2002
- County of Anoka, Unincorporated Areas July 1979

The reports stated that Anoka County is susceptible to flooding due to the low-lying areas of the community adjacent to the Rum River, West Branch Sunrise River, Cedar Creek and Ford Brook. Flooding is mostly caused by snowmelt in combination with spring rains. Major floods on the Rum River occurred in 1952, 1965, 1969 and 1972.

Historical flood hazards in Anoka are also addressed in the Anoka County All Hazard Mitigation Plan prepared by Anoka County Emergency Management in 2006.

The 1997 spring flooding along the upper Minnesota River, Red River, Mississippi River and Rum River broke most existing flood records in Minnesota. The Federal Emergency Management Agency's (FEMA) estimate of public infrastructure damage in Minnesota from the flood was approximately \$300 million. Before the water receded, 58 of Minnesota's 87 counties were declared federal disaster areas. The American Red Cross reported that the massive floods affected 23,263 families. Total flood damages and associated economic impacts were estimated to be as high as \$2 billion.

The City of Anoka, which is located along the lower Rum River and Mississippi River was impacted to the extent that residents were evacuated, city streets closed, and septic and drain fields failed. Clean up was extensive in removing sandbags and debris. For Ramsey, Fridley and Anoka the likelihood of occurrence is moderate but the impact is considered high.

Columbia Heights also experienced flooding citywide in 1997, with street flooding and flooding of structures in low areas. The likelihood of occurrence is considered moderate. Loss impact of future occurrence is less likely due to mitigation projects to correct flooding problems although the impact will continue to be moderate.

In April of 2001 heavy snowfall during winter remained on the ground through the end of March and then rapidly melted, resulting in river stages close to record levels. Numerous roads and bridges were closed and thousands of sandbags used.

Coon Rapids located along the east bank of the Mississippi River experienced flooding from the Mississippi River in April of 1965, 1997 and 2001. All three years were the result of heavy spring rains combined with heavy winter snowfall amounts in the Mississippi River drainage areas. The southwest corner of the city required sandbagging for approximately 25 homes. Additional sandbagging was necessary for an additional 12 properties in the northwest corner of the city. The river overflowing its banks threatens homes and property, utilities, and back-flooding of sanitary and storm water sewer systems. Out of banks flooding is likely to occur once or twice per decade. Future impact is considered moderate.

In Blaine flooding occurs during heavy rains especially in the spring when melting snow contributes water to the area. Major flooding occurred in July of 2002. Flooding occurred citywide and inundated many basements. Blaine is about 60% developed and is comprised of a considerable amount of "low land" which is drained by watershed ditches. As the city becomes more developed and more houses and streets are constructed, heavy rains will likely cause similar flooding. Future occurrence will result in street flooding that interrupts traffic flow and consumes resources, detouring traffic and marking hazards. Damage may also be sustained by citizens of older home that lack waterproofed basements.

Historical Flood Events

In the past decade, 12 flood events were reported to the National Climatic Data Center (NCDC) for Anoka County. The most costly flood event, in terms of property and crop damage, occurred in 2001 from April 1 to April 30 across 42 counties in Minnesota. Heavy snowfall during winter remained on the ground through the end of March and then rapidly melted, resulting in river stages close to record levels. Water began to gush through drainage ditches, streams and into the mainstem rivers during midday April 1. Heavy rain April 7-8 over much of central Minnesota prolonged the high water and also added one or two feet to many crests during mid April. Another period of heavy rain April 22-23 (see corresponding flood entry) caused rivers to crest again in late April and early May; in some cases the crest was higher than the first. Many rivers remained well above flood stage into mid-May (see May 2001 Storm Data). The crest at Montevideo on the Minnesota River was the second highest ever; only 1.3 feet lower than in 1997. The crest at Stillwater on the St. Croix River was the second highest crest ever; only 1.8 feet lower than in 1965. The crest on the Minnesota River at Henderson came within one half foot of its record level that was set in 1965. The Mississippi River at St. Paul, Hastings, and Red Wing crested at its third highest level ever, lower only than during the floods of 1965 and 1969. Numerous roads and bridges were closed, millions of sandbags used, and approximately 200 homes and businesses were partially submerged with flood waters. About 100 homes and businesses were damaged beyond repair.

Table 1 lists Anoka County's historical floods since 1997 as recorded by NCDC.

Anoka County	6/20/2005	12:45 PM	Flash Flood	N/A	0	0	5K	0
Anoka County	7/23/2005	10:00 AM	Flash Flood	N/A	0	0	0	0

South Portion	9/21/2005	6:30 PM	Flash Flood	N/A	0	0	0	0
South Portion	10/4/2005	7:30 PM	Flash Flood	N/A	0	0	0	0
Johnsville	8/8/2009	9:43 AM	Flash Flood	N/A	0	0	0	0

The National Oceanic and Atmospheric Administration (NOAA) Advanced Hydrologic Prediction Service provides information from gauge locations at points along various rivers across the United States. For Anoka County, data is provided for two points: Rum River at St. Francis and Mississippi River at Anoka

The stream gauge location for Rum River at St. Francis is pictured in Figure 1.

Figure 1: Stream Gauge Location for Rum River at St. Francis

The highest historical crests are shown below in Table 2.

Table 2: Historical Flood Crests for Rum River at St. Francis

Date	Height (Feet)

04/07/1952	838.80
04/16/1960	838.40

HAZUS-MH Hazard Analysis

Flood analysis for Anoka County was performed using HAZUS-MH MR4 released in August 2009. The bundled aggregated general building stock was updated to Dun & Bradstreet 2006. Building valuations were updated to R.S. Means 2006. Building counts based on census housing unit counts are available for RES1 (single-family dwellings) and RES2 (manufactured housing) instead of calculated building counts.

The site specific inventory (specifically Schools, Hospitals, Fire Stations and Police Stations) was updated using the best available statewide information.

HAZUS-MH was used to generate the flood depth grid for a 100-year return period calculated by clipping the USGS 30m DEM to the DNR Q3 boundary.

Figure 3 depicts the flood boundary from the HAZUS-MH analysis.

Figure 3: Anoka County HAZUS-MH Analysis (100-Year Flood)

HAZUS-MH Aggregate Loss Analysis

HAZUS-MH was used to estimate the damages incurred for a 100-year flood event in Anoka County. An estimated 2,935 buildings will be damaged totaling \$586 million in building losses and \$1.1 billion in total economic losses. The total estimated number of damaged buildings, total building losses, and estimated total economic losses are shown in Table 3.

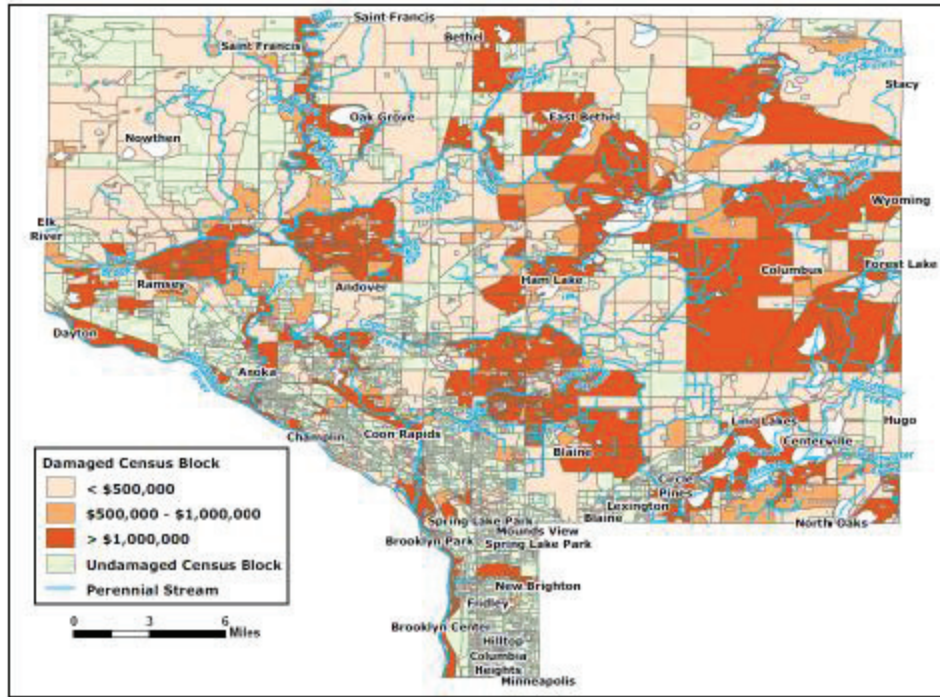

Table 3: Anoka County Total Economic Loss - 100-Year Flood

General Occupancy	Estimated Total Buildings	Total Damaged Buildings	Total Building Exposure X 1000	Total Economic Loss X 1000	Building Loss X 1000
Agricultural	341	0	\$74,179	\$7,233	\$1,920
Commercial	5,193	24	\$3,191,541	\$226,427	\$60,617
Education	99	0	\$220,910	\$13,286	\$2,055
Government	75	0	\$79,675	\$5,395	\$572
Industrial	2,198	2	\$1,636,292	\$100,570	\$30,279
Religious/Non-Profit	316	0	\$288,102	\$34,367	\$4,698
Residential	99,195	2,909	\$18,677,168	\$742,739	\$485,915
Total	107,417	2,935	\$24,167,867	\$1,130,017	\$586,056

HAZUS-MH estimates 309 census blocks with losses exceeding \$1 million. The distribution of losses is shown in Figure 4.

The reported building counts should be interpreted as degrees of loss rather than as exact numbers of buildings exposed to flooding. These numbers were derived from aggregate building inventories which are assumed to be dispersed evenly across census blocks. HAZUS-MH requires that a predetermined amount of square footage of a typical building sustain damage in order to produce a damaged building count. If only a minimal amount of damage to buildings is predicted, it is possible to see zero damaged building counts while also seeing economic losses.

Figure 4: Anoka County Total Economic Loss - 100-Year Flood

Census blocks of concern should be reviewed in more detail to determine the actual percentage of facilities that fall within the flood hazard areas. The aggregate losses reported in this study may be overstated. The figures 5a and 5b below are examples of census blocks where the highest damages were reported.

Figure 5a: Flood Damage Exposure in southwest side of Ham Lake City

Figure 5a shows census blocks overlaid with the flood boundary and orthophoto of Ham Lake City. Census block # 270030502151010 has an estimated building loss of \$12.7 million and a total economic loss of \$29.2 million. The overlay shows significant flooding in this census block and several buildings are at risk.

Figure 5b: Flood Damage Exposure in eastside of Anoka

Figure 5b shows census blocks overlaid with the flood boundary and orthophoto of Anoka. Census block # 270030504003002 has an estimated building loss of \$9.9 million with a total loss of \$16.8 million. Although the overlay shows moderate flooding in this census block, few buildings are at risk.

HAZUS-MH Essential Facility Loss Analysis

Essential facilities encounter the same impacts as other buildings within the flood boundary: structural failure, extensive water damage to the facility, and loss of facility functionality (i.e. a damaged police station will no longer be able to serve the community).

The HAZUS-MH analysis identified 13 facilities that may be subject to flooding. A list of the essential facilities within Anoka County that may experience damages is included in Tables 4 and 5. A map of some essential facilities potentially at risk to flooding is shown in Figure 6.

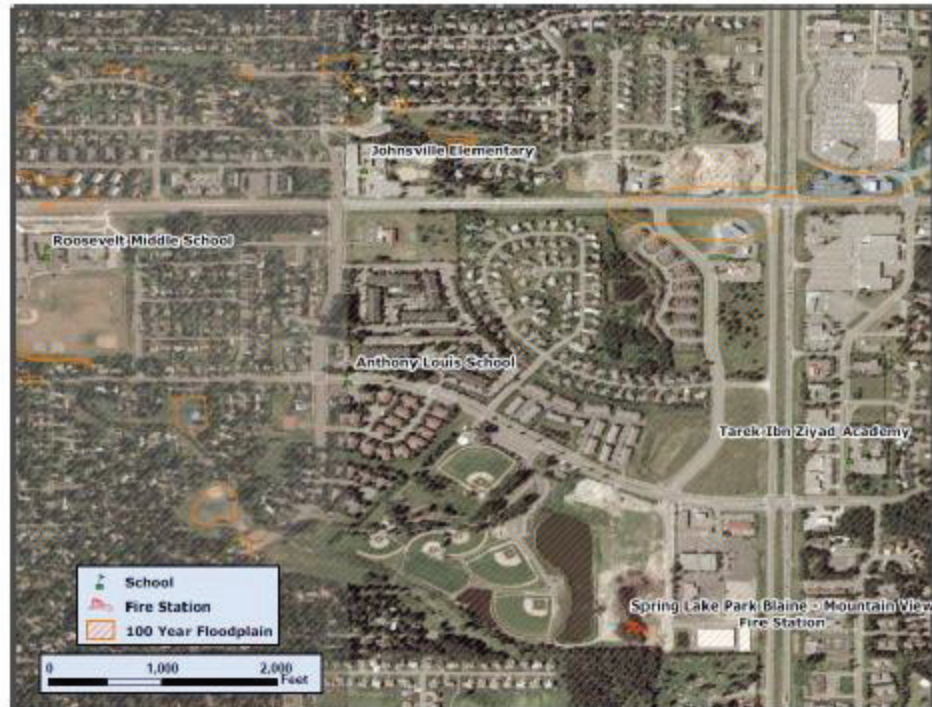

Table 4: Anoka County Essential Facility Loss - 100-Year Flood

Class	Building Count	At Least Moderate Damage	At Least Substantial Damage	Loss of Use
Care Facilities	9	0	0	0
Fire Stations	30	4	0	0
Police Stations	11	0	0	0
Schools	158	9	0	2
Total	208	13	0	2

Figure 6: 100-Year Flood Boundary Overlaid with Essential Facilities

HAZUS-MH Shelter Requirement Analysis

HAZUS-MH estimates the number of households that are expected to be displaced from their homes due to the flood and the associated potential evacuation. HAZUS-MH also estimates those displaced people that may require accommodations in temporary public shelters. The model estimates 15,715 households may be displaced due to the flood. Displacement includes households evacuated from within or very near to the inundated area. Of these 40,982 people (out of a total population of 298,084) may seek temporary shelter in public shelters.

HAZUS-MH Debris Generation Analysis

HAZUS estimates the amount of debris that may be generated by the flood. The model breaks debris into three general categories: 1) Finishes (dry wall, insulation, etc.), 2) Structural (wood, brick, etc.) and 3) Foundations (concrete slab, concrete block, rebar, etc.). This distinction is made because of the different types of material handling equipment required to handle the debris.

The model estimates that a total of 58,810 tons of debris may be generated. Of the total amount, Finishes comprises 43% of the total, Structure comprises 33% of the total. If the debris tonnage is converted into an estimated number of truckloads, it will require 2,352 truckloads (@25 tons/truck) to remove the debris generated by the flood.

HAZUS-MH State Property Loss Analysis

The HAZUS-MH generated flood boundaries were overlaid with the State of Minnesota owned buildings to determine if any structures are at risk to flooding. State properties of concern should be reviewed in more detail to determine if the buildings actually fall within the flood hazard areas. Table 6 provides a list of state owned buildings impacted by the flood. Figures 7 and 8 shows one of the inundated areas.

Appendix C Mitigation Community Survey Results

Results from Current survey will be included here.

Public Participation Survey Results

In addition to community meetings an electronic survey was made available to Anoka County residents soliciting their input concerning the Anoka County Hazardous Mitigation Planning Process and their experiences with hazardous and critical emergency situations. A total of 61 surveys were returned. The results from select questions are located below. For full results, please click on the PDF document of the survey.

Anoka County Hazard Mitigation Community
Survey

1. Please select the jurisdiction where you live or work in Anoka County

	Response Percent	Response Count
Andover	6.0%	4
Anoka	7.5%	5
Bethel	0.0%	0

1 of 18

Our Hazard Mitigation Plan has identified the hazards listed below as being most likely to impact Anoka County. Please select the three hazards that are the greatest concern for your home or work

Answer Options	Response Percent	Response Count
Urban Fire (House, Apartment or Business Fire)	38.5%	25
Thunderstorms (Wind and Hail Damage)	64.6%	42
Flooding	9.2%	6
Tornados	76.9%	50
Wild Fires (Large grass fire in a wild land setting)	13.8%	9
Pandemics / Vectors (Diseases / Viruses)	20.0%	13
Winter Storms	29.2%	19
Terrorism	6.2%	4
Hazardous Materials	13.8%	9
Illegal Meth Labs (Chemical Hazard)	16.9%	11
<i>answered question</i>		65

What are you doing on your property or inside your home or work to reduce the vulnerability to the above listed hazards? (Please select all that apply)

Answer Options	Response Percent	Response Count
Maintain smoke alarms	92.1%	58
Maintain NOAA Weather Radio	61.9%	39
Install backflow preventer on sewer line	7.9%	5
Defensible space landscaping (clear vegetation around house to reduce wildfire risk)	12.7%	8
Installed or will install fire sprinklers	3.2%	2
Strengthened openings (Doors, windows, and/or garage door to reduce high-hazard wind risk)	19.0%	12
Install or will install safe room in home or work	6.3%	4
Other (please specify)	11.1%	7
<i>answered question</i>		63

If a severe hazard event occurred today (large earthquake or dam failure) such that all services were cut off from your home (power, gas, water, and sewer) and you were unable to leave or access a store for 72 hours, which of these items do you have readily available? (Please select all that apply)

Answer Options	Response Percent	Response Count
Potable Water (3 gallons per person)	38.5%	25
Extra Clothes and Shoes	90.8%	59
Cooking and eating utensils	92.3%	60
Blanket(s)/ Sleeping Bag(s)	96.9%	63
Can Opener	96.9%	63
Cash	52.3%	34
Canned / Non-perishable Foods (ready to eat)	86.2%	56

Flashlight (with batteries)	95.4%	62
Gas grill / Camping stove	80.0%	52
Gasoline stored approved container	46.2%	30
Extra Medications	58.5%	38
Telephone (with batteries)	66.2%	43
First Aid Kit/Supplies	92.3%	60
Pet Supplies	56.9%	37
Portable AM/FM Radio (solar powered, hand crank, or batteries)	52.3%	34
Handheld "Walkie-Talkie" Radios (with batteries)	40.0%	26
Important Family Photos/Documentation in a water and fire proof container	38.5%	25
Additional Preparedness Steps	12.3%	8
<i>answered question</i>		65

What are the most important things local government can do to help communities be more prepared for a disaster

Answer Options	Response Percent	Response Count
Disseminate effective emergency notifications and communication	81.0%	51
Training and education to residents and business owners on how to reduce future damage	54.0%	34
Community outreach regarding emergency preparedness	63.5%	40
Being aware of special needs and vulnerable populations	50.8%	32
Make a plan to use volunteer residents to help in a disaster	69.8%	44
Additional Preparedness Steps	7.9%	5
<i>answered question</i>		63

Appendix E Key Federal Hazard mitigation Funding programs

This section of the Plan includes a listing of some of the key, well-established federal hazard mitigation funding programs available to implement future mitigation projects. Additional sources of mitigation funding are routinely made available through a variety state and federal agencies, though the program names, funding amounts and eligibility criteria will vary over time.

Key Federal Hazard mitigation Funding programs			
Grant Name	Agency	Purpose	Contact
Pre-Disaster Mitigation Program (PDM)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To provide funding for States and communities for cost-effective hazard mitigation activities, which complements comprehensive hazard mitigation, program and reduce injuries, loss of life, and damage and destruction of property.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Emergency Management Performance Grants (EMPG)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To encourage the development of comprehensive emergency management at the State and local level and to improve emergency management planning, preparedness, mitigation, response, and recovery capabilities.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Hazard Mitigation Grant Program (HMGP)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To prevent future losses of lives and property due to disasters; to implement State or local hazard mitigation plans; to enable mitigation measures to be implemented during immediate recovery from a disaster; and to provide funding for previously identified mitigation measures to benefit the disaster area.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Flood Mitigation Assistance Program (FMA)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To help States and communities plan and carry out activities designed to reduce the risk of flood damage to structures insurable under the NFIP.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Community Development Grant Program (CDBG)	U.S. Department of Housing and Urban Development	To develop viable urban communities by providing decent housing and a suitable living environment. Principally for low to moderate-income individuals.	HUD 451 7th Street, S.W. Washington, DC 20410 Phone: (202) 708-3587
Public Assistance Program (PA)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To provide supplemental assistance to States, local governments, and certain private nonprofit organizations to alleviate suffering and hardship resulting from major disasters or emergencies declared by the President. Under Section 406, Public Assistance funds may be used to mitigate the impact of future disasters.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Flood Control Works / Emergency Rehabilitation	U.S. Department of Defense, Army Corps of Engineers	To assist in the repair and restoration of public works damaged by flood, extraordinary wind, wave, or water action.	USACE 20 Massachusetts Avenue, N.W. Washington, DC 20314 Phone: (202) 761-0001
Emergency Watershed Protection	U.S. Department of Agriculture, Natural Resource Conservation Svc	To provide emergency technical and financial assistance to install or repair structures to reduce runoff and prevent soil erosion to safeguard life and property.	NRCS PO Box 2890 Washington, DC 20013 Phone: (202) 720-3527

Watershed Protection and Flood Prevention	U.S. Department of Agriculture, Natural Resource Conservation Svc	To provide technical and financial assistance in planning and executing works of improvement to protect, develop, and use land and water resources in small watersheds.	NRCS PO Box 2890 Washington, DC 20013 Phone: (202) 720-3527
Land and Water Conservation Fund Grants	U.S. Department of the Interior, National Park Service	To acquire and develop outdoor recreation areas and facilities for the general public, to meet current and future needs.	NPS PO Box 37127 Washington, DC 20013 Phone: (202) 565-1200
Disaster Mitigation and Technical Assistance Grants	U.S. Department of Commerce, Economic Development Administration	To help States and localities to develop and/or implement a variety of disaster mitigation strategies.	EDA Herbert C. Hoover Bldg. Washington DC, 20230 Phone: (800) 345-1222
Pre-Disaster Mitigation Loan Program	U.S. Small Business Administration	To make low-interest; fixed-rate loans to eligible small businesses for the purpose of implementing mitigation measures to protect business property from damage that may be caused by future disasters.	SBA 1110 Vermont Avenue, N.W., 9 th Floor Washington, DC 20005 Phone: (202) 606-4000
Watershed Surveys and Planning	U.S. Department of Agriculture, Natural Resource Conservation Svc	To provide planning assistance to Federal, State, and local agencies for the development of coordinated water and related land resources programs in watersheds and river basins.	NRCS PO Box 2890 Washington, DC 20013 Phone: (202) 720-3527
National Earthquake Hazards Reduction Program (NEHRP)	U.S. Department of Homeland Security, Federal Emergency Management Agency	To mitigate earthquake losses that can occur in many parts of the nation providing earth science data and assessments essential for warning of imminent damaging earthquakes, land-use planning, engineering design, and emergency preparedness decisions.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Assistance to Firefighters Grant	U.S. Department of Homeland Security, Federal Emergency Management Agency	Competitively awarded project grants to provide direct assistance, on a competitive basis, to fire departments for the purpose of protecting the health and safety of the public and Fire fighting personnel against fire and fire-related hazards.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Fire Management Assistance Grants	U.S. Department of Homeland Security, Federal Emergency Management Agency	To provide project grants and the provision of specialized services for the mitigation, management, and control of fires that threatens such destruction as would constitute a major disaster.	FEMA 500 C Street, S.W. Washington, DC 20472 Phone: (202) 646-4621
Emergency Stream bank and Shoreline Protection	U.S. Department of Defense, Army Corps of Engineers	To prevent erosion damages to public facilities by the emergency construction or repair of stream bank and shoreline protection works.	USACE 20 Massachusetts Avenue, N.W. Washington, DC 20314 Phone: (202) 761-0001
Small Flood Control Projects	U.S. Department of Defense, Army Corps of Engineers	To reduce flood damages through small flood control projects not specifically authorized by Congress.	USACE 20 Massachusetts Avenue, N.W. Washington, DC 20314 Phone: (202) 761-0001
Clean Water Act Section 319 Grants	U.S. Environmental Protection Agency	To implement non-point source programs, including support for non-structural watershed resource restoration activities.	EPA 1200 Pennsylvania Ave. N.W. Washington, DC 20460 Phone: (202) 272-0167

Appendix F Minnesota Mitigation Planning Review Aid

The requirements crosswalk used in previous guidance to evaluate plan is replaced with the Local Mitigation Plan Review Tool found in FEMA's Local Mitigation Plan Review Guide, October 2011.

This review aid is provided to planners to assist with the development of local multi-jurisdiction mitigation plans.

FEMA's Mitigation Plan Review Tool lists all of the elements but not the requirements as in the previous crosswalk. Section 1: Planning Checklist of this aid lists the requirements under each element for easy reference. The planner should indicate the location of the plan to indicate where the requirement is met.

All jurisdictions participating in the mitigation planning process must show evidence of participation in Elements A thru E of the Regulation Checklist. The Multi-Jurisdictional Summary Sheet from FEMA guidance was edited for use by planners. The summary sheet is a way to track participation by jurisdiction.

HSEM asks that a Minnesota Mitigation Planning Review Aid is completed when the plan is sent to HSEM for review. A completed aid will facilitate the state review by illustrating how requirements were met.

Jurisdiction: Anoka County, MN	Title of Plan: Anoka County Multi-Jurisdictional All Hazards Mitigation Plan	Date of Plan: May 14, 2012
Local Point of Contact: Ryan Kelzenberg	Address:	
Title: Emergency Management Specialist		
Agency: Anoka County Emergency Management		
Phone Number: 763.323.5264	E-Mail: Ryan.kelzenberg@co.anoka.mn.us	
State Reviewer: Jim McClosky	Title: Mitigation Planner	Date: 5/22/12

Section 1 Regulation Checklist

ELEMENT A. PLANNING PROCESS

A1. Does the Plan document the planning process, including how it was prepared and who was involved in the process for each jurisdiction? 44 CFR 201.6(c)(1)	
REQUIREMENT	LOCATION
a. Documentation of how the plan was prepared must include the schedule or timeframe and activities that made up the plan's development as well as who was involved. Documentation typically is met with a narrative description, but may also include, for example, other documentation such as copies of meeting minutes, sign- in sheets, or newspaper articles.	MET: Section 2.4 The table on page 14 lists the meetings Action Completed: P 16 - 22 Updated with current meeting dates and summary for 2011 / 2012
b. The plan must list the jurisdiction(s) participating in the plan that seek approval.	Met: Section 2.7 – The county and cities are listed who are seeking approval.
c. The plan must identify who represented each jurisdiction. The Plan must provide, at a minimum, the jurisdiction represented and the person's position or title and agency within the jurisdiction.	Met: Section 2.3 – The representatives are listed starting on page 12.
d. For each jurisdiction seeking plan approval, the plan must document how they were involved in the planning process. For example, the plan may document meetings attended, data provided, or stakeholder and public involvement activities offered. Jurisdictions that adopt the plan without documenting how they participated in the planning process will not be approved.	Met: Anoka County Jurisdiction tracking sheet added to page 9
e. Plan updates must include documentation of the current planning process undertaken to update the plan.	Met: Section 2.4 outlines our update process (Page 16 – 22) Included steps needed for updating initial plan to this review

A2. Does the Plan document an opportunity for neighboring communities, local and regional agencies involved in hazard mitigation activities, agencies that have the authority to regulate development as well as other interests to be involved in the planning process? 44 CFR 201.6(b)(2)	
REQUIREMENT	LOCATION
a. The plan must identify all stakeholders involved or given an opportunity to be involved in the planning process. At a minimum, stakeholders must include: 1) Local and regional agencies involved in hazard mitigation activities; 2) Agencies that have the authority to regulate development; and 3) Neighboring communities.	Met: Section 2.6 – a general description is given Public notices and meeting attendance sheets are included in pages 279 – 284
b. The Plan must provide the agency or organization represented and the person's position or title within the agency.	Met: List of participants in the preview and planning process. Pages 14 – 16

A3. Does the Plan document how the public was involved in the planning process during the drafting stage? 44 CFR 201.6(b)(1) and 201.6(c)(1)	
REQUIREMENT	LOCATION
a. The plan must document how the public was given the opportunity to be involved in the planning process and how their feedback was incorporated into the plan. Examples include, but are not limited to, sign-in sheets from open meetings, interactive websites with drafts for public review and comment, questionnaires or surveys, or booths at popular community events.	Met: Section 2.5.1 – is a good overview. Public notices and meeting attendance sheets are included in pages 279 – 284 (Main Plan) Community Survey information and results covered in pages 175 – 180 (Main Plan) and results included in Appendix C (Annex)
b. The opportunity for participation must occur during the plan development, which is prior to the comment period on the final plan and prior to the plan approval / adoption.	Met: Section 2.5.2, has been updated to meet standards

A4. Does the Plan document the review and incorporation of existing plans, studies, reports, and technical information? 44 CFR 201.6(b)(3)	
REQUIREMENT	LOCATION
a. The plan must document <i>what</i> existing plans, studies, reports, and technical information were reviewed. Examples of the types of existing sources reviewed include, but are not limited to, the state hazard mitigation plan, local comprehensive plans, hazard specific reports, and flood insurance studies.	Met: Section 2.8 – this section meets the requirement.
b. The plan must document <i>how</i> relevant information was incorporated into the mitigation plan.	Met: Section 2.8: <u>Review and Incorporation of Existing Plans</u> Reviewed and updated on page 26.

A5. Is there discussion on how the community(ies) will continue public participation in the plan maintenance process? 44 CFR 201.6(c)(4)(iii)	
REQUIREMENT	LOCATION
a. The plan must describe how the jurisdiction(s) will continue to seek public participation after the plan has been approved and during the plan’s implementation, monitoring and evaluation.	Met: Section 5.3.4 – The varied methods stated in this section meets the requirement.

A6. Is there a description of the method and schedule for keeping the plan current (monitoring, evaluating and updating the mitigation plan within a 5- year cycle)? 44 CFR 201.6l(4)(i)	
REQUIREMENT	LOCATION
a. The plan must identify how, when, and by whom the plan will be monitored.	Met: Steering committee members and contact information on pages 14-16
b. The plan must identify how, when, and by whom the plan will be evaluated.	Met: 5.3. Mitigation Implementation and Plan Maintenance (plan will be monitored and reviewed, pages 273 – 276)
c. The plan must identify how, when, and by whom the plan will be updated.	Met: Sections 5.3.3 Monitoring, Evaluation, and Enhancement (Page 274-275)

d. The plan must include the title of the individual or name of the department/ agency responsible for leading each of these efforts.	Met: Assigned responsibility to Anoka County Emergency Management Director and staff, pages 275
--	---

ELEMENT B. HAZARD IDENTIFICATION AND RISK ASSESSMENT

B1. Does the Plan include a description of the type, location, and extent of all natural hazards that can affect each jurisdiction? 44 CFR 201.6(c)(2)(i) and 44 CFR 201.6(c)(2)(iii)	
REQUIREMENT	LOCATION
a. The plan must include a description of the natural hazards that can affect the jurisdiction(s) in the planning area.	Met: Section 4.3– the natural hazards are described. Why are hazards being described that were not selected?
b. The plan must provide the rationale for the omission of any natural hazards that are commonly recognized to affect the jurisdiction(s) in the planning area.	Met: Section 4.3 – Page 69 has a good summary.
c. The description, or profile, must include information on location, extent, previous occurrences, and future probability for each hazard. Previous occurrences and future probability are addressed in sub-element B2.	met: Future probability is listed on page 113-115 of the main plan. For our plan we used Very Likely, Likely, or Possible for the chance an event occurring in a particular Jurisdiction during any single year.
d. For participating jurisdictions in a multi-jurisdictional plan, the plan must describe any hazards that are unique and/or varied from those affecting the overall planning area.	Met: In our plan for section 4.4.3- Page 115. The differences were identified in the risk between the jurisdictions. We did an analysis of four Hazards to represent the possible affects and loss that they could have on any of the Jurisdictions.

B2. Does the Plan include information on previous occurrences of hazard events and on the probability of future hazard events for each jurisdiction? 44 CFR 201.6(c)(2)(i)	
REQUIREMENT	LOCATION
a. The plan must include the history of previous hazard events for each of the identified hazards.	Met: Previous History of Events - are located section 4.3 with each of the natural and manmade hazards that were identified as risks in Anoka County (Main Plan pages 90 - 109) To help identify hazard trends we used the Anoka County Fire calls from 2006 to 2011 to review trends (Annex pages 3 - 9) Meth lab seizures are summarized in (Annex pages 11 - 12)
b. The plan must include the probability of future events for each identified hazard.	Met: Probability of future events : This is included in our Hazard Vulnerability section 4.4 (Pages 111-121)
c. Plan updates must include hazard events that have occurred since the last plan was developed.	Met: Additional history of events is included in 4.4.4 (Main plan pages 111 - 121) ratings for the hazards and impact in each jurisdiction are slightly different due to the makeup of each jurisdiction. (Main Plan page 115 and

B3. Is there a description of each identified hazard's impact on the community as well as an overall summary of the community's vulnerability for each jurisdiction? 44 CFR 201.6(c)(2)(ii)

REQUIREMENT	LOCATION
a. For each participating jurisdiction, the plan must describe the potential impacts of each of the identified hazards on the community.	Met: Hazard Vulnerability updated and reviewed for each jurisdiction – Pages 110 – 132
b. The plan must provide an overall summary of each jurisdiction's vulnerability to the identified hazards. The overall summary of vulnerability identifies structures, systems, populations or other community assets as defined by the community that are susceptible to damage and loss from hazard events. A plan will meet this sub- element by addressing the requirements described in §201.6(c)(2)(ii)(A- C).	Met: Hazard Vulnerability updated and reviewed for each jurisdiction – Pages 110 – 132

B4. Does the Plan address NFIP insured structures within each jurisdiction that have been repetitively damaged by floods? 44 CFR 201.6(c)(2)(ii)

REQUIREMENT	LOCATION
a. The plan must describe the types (residential, commercial, institutional, etc.) and estimate the numbers of repetitive loss properties located in identified flood hazard areas.	Met: Section 4.4.2.1 –repetitive Flooding Structures. Page 119

ELEMENT C. MITIGATION STRATEGY

C1. Does the plan document each jurisdiction's existing authorities, policies, programs and resources, and its ability to expand on and improve these existing policies and programs? 44 CFR 201.6(c)(3)

REQUIREMENT	LOCATION
a. The plan must describe each jurisdiction's existing authorities, policies, programs and resources available to accomplish hazard mitigation.	Met: Section 5.1 does a very in depth profile of the each jurisdictions capabilities.

C2. Does the Plan address each jurisdiction’s participation in the NFIP and continued compliance with NFIP requirements, as appropriate? 44 CFR 201.6(c)(3)(ii)	
REQUIREMENT	LOCATION
<p>a. The plan must describe each jurisdiction’s participation in the NFIP and describe their floodplain management program for continued compliance. Simply stating “The community will continue to comply with NFIP,” will not meet this requirement. The description could include, but is not limited to:</p> <ul style="list-style-type: none"> • Adoption and enforcement of floodplain management requirements, including regulating new construction in Special Flood Hazard Areas (SFHAs); • Floodplain identification and mapping, including any local requests for map updates; or • Description of community assistance and monitoring activities. 	<p>Met: Flood Management Plan (Description – Page 161)</p> <p>Information on NFIP- Page 161-162 A table is given with the jurisdictions that are participating in NFIP. Defines what their Community Rating System(CRS)</p> <p>Anoka County GIS was used extensively to create and update the maps though out the plan. We also used the maps and information provided from the Anoka County Vulnerability report assists in identification of at risk properties from floods.</p> <p>Anoka County Vulnerability Report (Appendix page 14 - 28) Anoka County 100 / 500 year flood map (Main Plan page 92) Anoka County Flood Maps (Appendix pages 48 - 69)</p>

C3. Does the Plan include goals to reduce/avoid long- term vulnerabilities to the identified hazards? 44 CFR 201.6l(3)(i)	
REQUIREMENT	LOCATION
<p>a. The plan must include general hazard mitigation goals that represent what the jurisdiction(s) seeks to accomplish through mitigation plan implementation.</p> <p><i>Goals are broad policy statements that explain what is to be achieved.</i></p>	<p>Met: 5.2.2 Mitigation Goals Page 173 (Community Goals)</p>
<p>b. The goals must be consistent with the hazards identified in the plan.</p>	<p>Met: 5.2.1 Overview Page 172 r</p> <p><i>Goals reflect hazard they are attempting to mitigate</i></p>

C4. Does the Plan identify and analyze a comprehensive range of specific mitigation actions and projects for each jurisdiction being considered to reduce the effects of hazards, with emphasis on new and existing buildings and infrastructure? 44 CFR 201.6©(3)(ii) and 44 CFR 201.6©(3)(iv)

REQUIREMENT	LOCATION
a. The plan must include a mitigation strategy that 1) analyzes actions and/or projects that the jurisdiction considered to reduce the impacts of hazards identified in the risk assessment, and 2) identifies the actions and/or projects that the jurisdiction intends to implement.	Met: The list of the Mitigation Actions listed by priority is in section 5.2.5 (Page 182 - 248 of the main plan)
b. Each jurisdiction participating in the plan must have mitigation actions specific to that jurisdiction that are based on the community's risk and vulnerabilities, as well as community priorities.	Met: The list of the Mitigation Actions listed by priority is in section 5.2.7 (Page 261 - 272 of the main plan)
c. The action plan must reduce risk to existing buildings and infrastructure as well as limit any risk to new development and redevelopment. With emphasis on new and existing building and infrastructure means that the action plan includes a consideration of actions that address the built environment.	Met: With goal 3.1 and specifically 3.1.4 Anoka County GIS provides the information and coordination with the Jurisdictions in Anoka County.

C5. Does the Plan contain an action plan that describes how the actions identified will be prioritized (including cost benefit review), implemented, and administered by each jurisdiction? 44 CFR 201.6©(3)(iii) and 44 CFR ©(3)(iv)

REQUIREMENT	LOCATION
a. The plan must describe the criteria used for prioritizing implementation of the actions.	MET: <i>STAPLEE was used to evaluate mitigation actions and prioritize mitigation actions within each Jurisdiction. (STAPLEE Process and rating system is listed on pages 249 – 259)</i> The final priority list for Mitigation actions by each Jurisdiction are listed in the main plan on pages 261-272
b. The plan must demonstrate when prioritizing hazard mitigation actions that the local jurisdictions considered the benefits that would result from the hazard mitigation actions versus the cost of those actions. The requirement is met as long as the economic considerations are summarized in the plan as part of the community's analysis. A complete benefic- cost analysis is not required. Qualitative benefits (for example, quality of life, natural and beneficial values, or other "benefits") can also be included in how actions will be prioritized.	Met: Pages 198 – 232: The estimated cost and the estimated benefit are listed in two separate columns for each mitigation actions.
c. The plan must identify the position, office, department, or agency responsible for implementing and administering the action (for each jurisdiction), and identify potential funding sources and expected timeframes for completion.	Met: Pages 198 – 232: A column listing responsibility meets this requirement.

C6. Does the Plan describe a process by which local governments will integrate the requirements of the mitigation plan into other planning mechanisms, such as comprehensive or capital improvement plans, when appropriate? 44 CFR 201.6(c)(4)(ii)	
REQUIREMENT	LOCATION
a. The plan must describe the community's process to integrate the data, information, and hazard mitigation goals and actions into other planning mechanisms.	Met: 5.2.7(Mitigation Actions Implementation) Section 5.3.1 (Implementation) Pg 261-273
b. The plan must identify the local planning mechanisms where hazard mitigation information and/or actions may be incorporated.	Met: Section 5.2.7 – Mitigation Actions Implementation Updated tables to reflect mitigation actions of each jurisdiction. Page 261 - 272
c. A multi-jurisdictional plan must describe each participating jurisdiction's individual process for integrating hazard mitigation actions applicable to their community into other planning mechanisms.	Met: 5.3.1: Implementation- shows each Jurisdiction is responsible for implementing their goals into their specific plans. Page 273
d. The updated plan must explain how the jurisdiction(s) incorporated the mitigation plan, when appropriate, into other planning mechanisms as a demonstration of progress in local hazard mitigation efforts	Met: Added section pointing readers to completed mitigation goals (section 5.2.7) Preview Mitigation measures also listed on page 169
e. The updated plan must continue to describe how the mitigation strategy, including the goals and hazard mitigation actions will be incorporated into other planning mechanisms.	Met: Updated tables (Mitigation Actions Prioritization) reflect mitigation actions of each jurisdiction. Page 261 - 272

Note:

ELEMENT D. PLAN REVIEW, EVALUATION, AND IMPLMENTATION

D1. Was the plan revised to reflect changes in development? 44 CFR 201.6(d)(3)	
REQUIREMENT	LOCATION
a. The plan must describe changes in development that have occurred in hazard prone areas and increased or decreased the vulnerability of each jurisdiction since the last plan was approved. If no changes in development impacted the jurisdiction's overall vulnerability, plan updates may validate the information in the previously approved plan.	Met: Section 4.4.7 describes land use development meets part of the requirement. Each jurisdiction are included in their jurisdiction Descriptions Section 3.1,

D2. Was the plan revised to reflect progress in local mitigation efforts? 44 CFR 201.6(d)(3)	
REQUIREMENT	LOCATION
a. The plan must describe the status of hazard mitigation actions in the previous plan by identifying those that have been completed or not completed. For actions that have not been completed, the plan must either describe whether the action is no longer relevant or be included as part of the updated action plan.	Met: Section 5.1.6 does a nice job of listing completed mitigation actions.

D3. Was the plan revised to reflect changes in priorities? 44 CFR 201.6(d)(3)	
REQUIREMENT	LOCATION
a. The plan must describe if and how any priorities changed since the plan was previously approved. If no changes in priorities are necessary, plan updates may validate the information in the previously approved plan.	Met: Goals are outlined as new, ongoing, completed or canceled in section 5.2.5(Process listed on page 183)

ELEMENT E. PLAN ADOPTION

E1. Does the Plan include documentation that the plan has been formally adopted by the governing body of the jurisdiction requesting approval? 44 CFR 201.6(c)(5)	
REQUIREMENT	LOCATION
<p>a. The plan must include documentation of plan adoption, usually a resolution by the governing body or other authority.</p> <p>In Minnesota, the county passes a formal resolution to adopt the plan. This should take place immediately after FEMA review to allow the cities time to adopt the plan.</p>	<i>To be completed after FEMA review</i>

E2. For multi- jurisdictional plans, has each jurisdiction requesting approval of the plan documented formal plan adoption? 44 CFR 201.6(c)(5)	
REQUIREMENT	LOCATION
<p>a. Each jurisdiction that is included in the plan must have its governing body adopt the plan prior to FEMA approval, even when a regional agency has the authority to prepare such plans.</p> <p>HSEM recommends that cities adopt the within six months of the county adopting the plan to ensure all adoption requirements are met.</p>	<i>To be completed after FEMA review</i>

Section 2 Multi-Jurisdictional Summary Sheet

INSTRUCTIONS: Complete the Multi-jurisdiction Summary Spreadsheet by listing each participating jurisdiction which required Elements for each jurisdiction were 'Met' or 'Not Met'. Adoption resolutions may be tracked after the plan was reviewed by FEMA 'pending local adoption'. This Summary Sheet does not imply that a mini-plan be developed for each jurisdiction; it should be used as an optional worksheet to ensure that each jurisdiction participating in the Plan has been documented and has met the requirements for those Elements (A through E).

#	Jurisdiction Name	Jurisdiction Type (county/city)	Requirements Met (Y/N)				
			A. Planning Process	B. Hazard Identification & Risk Assessment	C. Mitigation Strategy	D. Plan Review, Evaluation & Implementation	E. Plan Adoption
1	Anoka County	County					
2	Andover	City					
3	Anoka	City					
4	Bethel	City					
5	Blaine	City					
6	Nowthen	City					
7	Centerville	City					
8	Circle Pines	City					
9	Lexington	City					

10	Columbia Heights	City					
11	Columbus	City					
12	Coon Rapids	City					
13	East Bethel	City					
14	Fridley	City					
15	Ham Lake	City					
16	Hill Top	City					

#	Jurisdiction Name	Jurisdiction Type (county/city)	Requirements Met (Y/N)				
			A. Planning Process	B. Hazard Identification & Risk Assessment	C. Mitigation Strategy	D. Plan Review, Evaluation & Implementation	E. Plan Adoption
17	Linwood	City					
18	Oak Grove	City					
19	Ramsey	City					
20	St. Francis	City					
21	Spring Lake Park	City					

A. Plan Strengths and Opportunities for Improvement

This section provides a discussion of the strengths of the plan document and identifies areas where these could be improved beyond minimum requirements.

Element A: Planning Process

How does the Plan go above and beyond minimum requirements to document the planning process with respect to:

- *Involvement of stakeholders (elected officials/decision makers, plan implementers, business owners, academic institutions, utility companies, water/sanitation districts, etc.);*
- *Involvement of Planning, Emergency Management, Public Works Departments or other planning agencies (i.e., regional planning councils);*
- *Diverse methods of participation (meetings, surveys, online, etc.); and*
- *Reflective of an open and inclusive public involvement process.*

Element B: Hazard Identification and Risk Assessment

In addition to the requirements listed in the Regulation Checklist, 44 CFR 201.6 Local Mitigation Plans identifies additional elements that should be included as part of a plan's risk assessment. The plan should describe vulnerability in terms of:

- 1) A general description of land uses and future development trends within the community so that mitigation options can be considered in future land use decisions;*
- 2) The types and numbers of existing and future buildings, infrastructure, and critical facilities located in the identified hazard areas; and*
- 3) A description of potential dollar losses to vulnerable structures, and a description of the methodology used to prepare the estimate.*

How does the Plan go above and beyond minimum requirements to document the Hazard Identification and Risk Assessment with respect to:

- Use of best available data (flood maps, HAZUS, flood studies) to describe significant hazards;*
- Communication of risk on people, property, and infrastructure to the public (through tables, charts, maps, photos, etc.);*
- Incorporation of techniques and methodologies to estimate dollar losses to vulnerable structures;*
- Incorporation of Risk MAP products (i.e., depth grids, Flood Risk Report, Changes Since Last FIRM, Areas of Mitigation Interest, etc.); and*
- Identification of any data gaps that can be filled as new data became available.*

Element C: Mitigation Strategy

How does the Plan go above and beyond minimum requirements to document the Mitigation Strategy with respect to:

- *Key problems identified in, and linkages to, the vulnerability assessment;*
- *Serving as a blueprint for reducing potential losses identified in the Hazard Identification and Risk Assessment;*
- *Plan content flow from the risk assessment (problem identification) to goal setting to mitigation action development;*
- *An understanding of mitigation principles (diversity of actions that include structural projects, preventative measures, outreach activities, property protection measures, post-disaster actions, etc);*
- *Specific mitigation actions for each participating jurisdictions that reflects their unique risks and capabilities;*
- *Integration of mitigation actions with existing local authorities, policies, programs, and resources; and*
- *Discussion of existing programs (including the NFIP), plans, and policies that could be used to implement mitigation, as well as document past projects.*

Element D: Plan Update, Evaluation, and Implementation (Plan Updates Only)

How does the Plan go above and beyond minimum requirements to document the 5-year Evaluation and Implementation measures with respect to:

- *Status of previously recommended mitigation actions;*
- *Identification of barriers or obstacles to successful implementation or completion of mitigation actions, along with possible solutions for overcoming risk;*
- *Documentation of annual reviews and committee involvement;*
- *Identification of a lead person to take ownership of, and champion the Plan;*
- *Reducing risks from natural hazards and serving as a guide for decisions makers as they commit resources to reducing the effects of natural hazards;*
- *An approach to evaluating future conditions (i.e. socio-economic, environmental, demographic, change in built environment etc.);*
- *Discussion of how changing conditions and opportunities could impact community resilience in the long term; and*
- *Discussion of how the mitigation goals and actions support the long-term community vision for increased resilience.*

B. Resources for Implementing Your Approved Plan

Ideas may be offered on moving the mitigation plan forward and continuing the relationship with key mitigation stakeholders such as the following:

- *What FEMA assistance (funding) programs are available (for example, Hazard Mitigation Assistance (HMA)) to the jurisdiction(s) to assist with implementing the mitigation actions?*
- *What other Federal programs (National Flood Insurance Program (NFIP), Community Rating System (CRS), Risk MAP, etc.) may provide assistance for mitigation activities?*
- *What publications, technical guidance or other resources are available to the jurisdiction(s) relevant to the identified mitigation actions?*
- *Are there upcoming trainings/workshops (Benefit-Cost Analysis (BCA), HMA, etc.) to assist the jurisdictions(s)?*
- *What mitigation actions can be funded by other Federal agencies (for example, U.S. Forest Service, National Oceanic and Atmospheric Administration (NOAA), Environmental Protection Agency (EPA) Smart Growth, Housing and Urban Development (HUD) Sustainable Communities, etc.) and/or state and local agencies?*
