## Bubble Run Parking Plan – Allied Parking

1. Attendees will form two lanes and will be directed towards the rear of LOT G. Barricades will be used to ensure LOT F is not used yet.
2. Filling LOT G first will allow a large staging area off of the main road. We will have multiple sellers for each lane. Sellers will be cash or credit card only and will give tickets to show an attendee has paid.
3. LOT G will be filled from north end to south end. We will have employees directing traffic to form organized lanes. Sellers and traffic directors will move with traffic as we fill the lot.
4. As we follow the traffic and fill the lot, we will have a cutoff point and start to flow traffic into lot F. LOT F will be filled similarly to LOT G.
5. As we continue to fill LOT F, we will also have an established point where we will open south entrance of LOT D. LOT D will not need as many staff as the parking spots are established with lines.
6. This access point will remain closed throughout the event.
7. This access point will remain closed throughout the event.
8. Main Parking Lot East, West and Super Rink Lot North will be sold and filled simultaneously with lots G and F. Staging area will be created and cars will fill from back to front (East to West).
