

March 24, 2015

Jean Keeley  
City Engineer  
City of Blaine

Elite Transportation has been in its current location since 2004, and in the same neighborhood since 2000. Currently Elite has agreements with roughly 100 independent courier drivers that are required to turn in DOT mandated paperwork and customer documentation throughout their workweek. Half of these vehicles are small enough (cargo vans/cars) to pull into the parking lot, but the other half are much taller and longer. (goose neck trailers and dock trucks)

Due to the length of some of these vehicles, it is extremely difficult to pull through the parking area in front of the 9101 building. Elite has limited access to the back of the building, and is gated by building owner. We are unable to use the back area as a pass through as this area is reserved for storage of parts/equipment for other tenants of the building.

Due to the recent increase in parking enforcement, we are requesting that the No Parking area (marked with a star on the attached pictures) be changed to allow 15 minute temporary parking. This will provide a safe area bordering our property for these larger vehicles.

Thank you in advance for your time and consideration.
