(Continued information)

Description of Request:

Homeco Insulation, Inc. is a second-generation, Union insulation subcontractor established in 1986. We install commercial and residential insulation and have successfully completed the insulation on such projects as the TCF Bank Stadium and Target Field.

We are interested in relocating to Blaine in the industrial park because of the great neighborhood and location. We have four dock trucks that, per our meeting with the City, are acceptable because of the four overhead doors but we also have five cube vans that would reside outside the structure of the building for overnight parking in the parking lot. We would be unable to park the trucks inside as we need the warehouse space for products we install.

Thank you,
Donna Gulden
