## PROJECT NO. 13-01

### EXECUTIVE SUMMARY

The proposed project is part of the 2013 Pavement Management Program. The project will place a bituminous overlay on various city streets. Proposed improvements include a 1½ inch bituminous overlay, edge milling, spot curb replacement and appurtenant construction.

The estimated cost of improvements is \$1,157,255 with \$403,002.50 proposed to be assessed over a five-year period. The remaining portion of \$754,252.50 is proposed to be paid from the City's Pavement Management Program Funds.

The project is necessary, cost-effective, and feasible and will result in a benefit to the properties proposed to be assessed.

## 1. PROJECT HISTORY

The Blaine City Council initiated the project and ordered the preparation of a feasibility report on January 3, 2013, Resolution No. 13-007.

This report is based on field observations, record drawing information, and 2011 aerial photography.

## 2. PROJECT AREA CHARACTERISTICS

The project area includes various streets which have been rated and identified as needing an overlay before further deterioration can occur which would then require them to be reconstructed at a greater cost to both the city and the abutting property owners. The streets vary in age from 19 to 48 years old and many of them received a first overlay in the mid to late 1990's. The streets are in residential neighborhoods and have concrete curb and gutter. The following streets are included in the proposed project:

### 3. **PROPOSED STREET IMPROVEMENTS**

The proposed improvements will include a bituminous overlay to existing city streets as outlined in the Project Area Characteristics section and shown in the attached exhibits. The improvements are necessary, cost-effective, and feasible. Each improvement is further described as follows:

#### A. **Street Construction**

The residential streets will receive a six foot tapered edge mill along the curb and gutter edge. Then a 1-½ inch bituminous overlay will be placed over the existing bituminous street surface.

In addition, there are localized areas where curb and gutter has failed to a point where it would compromise the longevity of the new pavement if the curb and gutter were left as is. These sections of curb and gutter will be removed and replaced. Sections of failed curb and gutter exist on 126<sup>th</sup> Avenue (540 LF), Buchanan Circle (25 LF), 99<sup>th</sup> Lane (65 LF) and 7<sup>th</sup> Street (14 LF).

The project will also include the adjustment of existing manhole castings and gate valve boxes located within the street typical section to accommodate the bituminous overlays.

### 4. **IMPACT OF PROPOSED IMPROVEMENTS**

The proposed street improvements will not create any new maintenance issues for the Public Works staff. The City will work with affected property owners and the Contractor to resolve any situation that may arise during construction. Short term traffic delays, construction dust and noise will occur. Efforts to minimize these impacts include the restriction of work hours and dust control measures included in the project. Any disruptions that occur to existing yards and driveways will be restored.

5. **RELATED PROJECTS**

County Ditch 60 crosses under 118<sup>th</sup> Avenue, just west of 4<sup>th</sup> Street, via a large corrugated metal culvert. This culvert is nearing the end of its service life and needs replacement. A separate project to replace this culvert and associated storm sewer work will be completed prior to the 2013 Bituminous Overlay project.

6. **CONSTRUCTION SCHEDULE**

Due to the size of this overlay project, the project specifications will indicate that the construction cannot start before July 1<sup>st</sup>. This will provide enough time for the Blaine Public Works staff to complete the large number of catch basin rehabilitations in the project area and for the 118<sup>th</sup> Avenue culvert replacement to be completed.

## 8. ASSESSMENT METHODOLOGY

The Special Assessment Policy identifies that bituminous overlay projects will be assessed, depending on property classification, a flat rate of \$500 per unit or \$10 per front foot in 2010 construction costs, indexed yearly for inflation. The ENR Construction Index for November 2012 is 10796.97 (a 7.01% increase from November of 2010). Therefore the rate for overlay projects done in 2013 will be \$535.05 per residential lot unit for parcels zoned residential and \$10.70 per front foot for parcels zoned commercial/industrial and multi-family residential.

It is proposed that the 2013 Bituminous Overlay Project be assessed over 5 years using a flat rate of \$535.05 per residential lot unit or \$10.70 per front foot for parcels zoned commercial/industrial and multi-family residential. This method is consistent with the City of Blaine Special Assessment Policy.

See Exhibit Nos. 2-A through 2-H for the parcels proposed to be assessed and Exhibit No. 3 for the proposed assessment roll.

## 9. FINANCE

The proposed project will be temporarily financed by the City. Permanent funding will be provided by Pavement Management Program Funds and the costs assessed to the benefiting parcels in accordance with current City Assessment Policy and Minnesota Statutes Chapter 429, Special Assessment Laws.

### A. Finance Director Statement

With reference to this Feasibility Report for Improvement Project 13-01 as prepared by the City of Blaine Engineering Department dated February 21, 2013, I find the following:

1. The project will be temporarily funded through existing City internal funds whereupon permanent financing will be obtained through the City's securing of Pavement Management Program Funds and assessments.
2. Sufficient moneys are currently available from the City's internal funds to temporarily fund the special assessment portion of the project. It is estimated that \$403,002.50 will be assessed.
