

Who We Are

Crown Iron Works is a global supplier of oilseed extraction technology, refining plants and processing equipment. Since 1878, we've been delivering solutions that surpass all our customer's expectations. We are a leader in our business with over 400 Crown designed facilities operating world-wide. Our world headquarters has been in Minnesota since we were founded and in Roseville for 40 years.

What We Do

We deliver superior-quality, superior-value processing systems and technologies to the agricultural industry and beyond. Leading processing companies across the globe rely on our complete turnkey engineering capabilities. Crown also serves the nutraceutical, specialty chemical, food and waste industries in the areas of specialty extraction (process recovery of essential oils and extracts), CO2 extraction, and drying—with a variety of dryers, desolventizers and coolers for solvent- and water-wet products.

Why We Do It

From innovation, to education, to service, to support, Crown is committed the agricultural processing and industrial industries. We support our customers from project start to finish, and we are there to deliver support for the built facilities for the life of the equipment.
